

TABLE OF CONTENTS

DEDICATION	II
Agradecimientos	III
CHAPTER	
I. Funciones Simétricas	7
1.1. Nociones básicas	7
1.1.1. Tableaux de Young	10
1.1.2. Algoritmo de Robinson-Schensted-Knuth	12
1.2. El Anillo de las Funciones Simétricas	13
1.3. Funciones de Schur	14
1.4. Polinomios de Macdonald	18
II. Funciones k-Schur	21
2.1. Particiones k -acotadas, cores y su relación con el grupo simétrico afín	21
2.1.1. Grupo simétrico afín	24
2.2. Funciones k -Schur y k -Schur duales	30
III. Charge on tableaux and the poset of k-shapes	37
3.1. Introduction	37
3.2. Preliminaries	41
3.2.1. Partitions	41
3.2.2. k -shapes	43
3.2.3. Strings	44
3.2.4. Moves	45
3.3. The poset of k -shapes	47
3.4. (Co)charge of a k -tableau	50
3.5. Standard k -shape tableaux	56
3.6. Pushout algorithm in the standard case	58
3.7. Weak bijection in the standard case	64
3.8. Missing bijections and what they would entail	65
3.9. (Co)charge of a standard k -shape tableau	71
3.9.1. k -connectedness	71
3.9.2. Definition of charge and cocharge	72
3.9.3. Relation between charge and cocharge	75
3.10. Compatibility between (co)charge and the weak bijection	81
3.10.1. Row and column maximization	85
3.10.2. Maximal pushout (row case)	85
3.10.3. Maximal pushout (column case)	88
3.11. Conclusion	90

IV. .The Lascoux-Schützenberger action of the symmetric group on maximal	
<i>k</i>-shape tableaux	93
4.1. <i>k</i> -coloring	94
4.2. Consistency in the colorings	97
4.3. Maximal strips and sets of <i>k</i> -colors	99
4.4. Maximal double strips	101
4.5. Bijection on maximal double strips	106
BIBLIOGRAPHY	113
