

Contents

Introduction	3
Chapter 1. Preliminaries	13
Chapter 2. Norm Continuity	19
1. (a, k) -regularized resolvent families	19
2. Uniform continuity in L^∞ type spaces	21
3. (a, k) -regularized families with compact generator	26
4. Immediate norm continuity in Hilbert spaces	27
Chapter 3. Compactness	33
1. Fractional resolvent families	33
2. Characterization of compactness	34
3. Example: A problem with non-local initial condition	38
Chapter 4. Spectral Mapping Theorem	43
1. k -convoluted semigroups	43
2. Spectral Mapping Theorem	44
Chapter 5. Abstract cosine and sine functions on time scales	51
1. Laplace transform on time scales	51
2. Abstract cosine function on time scales	54
3. Time scales with the semigroup property	63
4. Abstract sine function on time scales	67
5. Inhomogeneous second order abstract Cauchy problem	70
6. Nonlinear second order abstract Cauchy problem	73
