

Contents

Introduction	5
Chapter 1. Preliminaries	9
1. The symmetric group	9
2. Young tableaux and set partitions	10
2.1. Combinatorics of Young tableaux	10
2.2. Set partitions	13
3. Cellular algebras	14
Chapter 2. Representation theory of the Yokonuma-Hecke algebra	17
1. Yokonuma Hecke algebra	17
2. Tensorial representation of $\mathcal{Y}_{r,n}(q)$	19
2.1. The modified Ariki-Koike algebra.	22
3. Cellular basis for the Yokonuma-Hecke algebra	26
3.1. $\mathcal{Y}_{r,n}$ is a direct sum of matrix algebras	36
4. Jucys-Murphy elements	39
Chapter 3. Representation theory of the braids and ties algebra	43
1. Braids and ties algebra	43
2. Decomposition of $\mathcal{E}_n(q)$	45
3. Cellular basis for $\mathcal{E}_n(q)$	47
4. $\mathcal{E}_n(q)$ is a direct sum of matrix algebras	63
List of Notations	67
Bibliography	69
