

Contents

1	Introduction.....	1
1.1	Background and problem	2
1.2	Objetives of the study.....	2
1.3	Contribution	2
1.4	Methodology	2
1.5	Main results and conclusions	3
1.6	Description of structure of the document	4
2	Analysis of the impact of behavioral and sector-specific variables in credit risk measurement for the agribusiness	5
2.1	Introduction.....	6
2.2	Measuring Credit Risk in the Agribusiness	8
2.3	Financing farmers in developing countries.....	11
2.4	Data	12
2.4.1	Data preparation.....	12
2.4.2	Database description.....	12
2.4.3	Variable selection and transformation.....	13
2.5	Experimental design.....	14
2.5.1	Classification techniques.....	14
2.5.2	Variable Sets	15
2.5.3	Type of borrowers.....	15
2.6	Results.....	16
2.6.1	Initial characteristic analysis.....	16
2.6.2	Model results	17
2.6.3	Importance of variables	23
2.7	Conclusions and future work.....	25
2.8	Acknowledgements	26

2.9	References	26
2.10	Appendices.....	30
2.10.1	Logistic Regression	30
2.10.2	Neural Networks	30
2.10.3	Random Forests	31
2.10.4	Data Statistics.....	33

Index of Tables

Table 1:	Credit scoring models for farmers	10
Table 2:	Amount of farmers loans in Chile. Original data from (ODEPA, 2013).	11
Table 3:	Information Value	17
Table 4:	AUC Results of All costumers	19
Table 5:	AUC Results of Persons.....	19
Table 6:	AUC Results of Companies.....	20
Table 7:	AUC Results of Holding Companies	20
Table 8:	Normalized AUC of All customers	21
Table 9:	Normalized AUC of Persons	21
Table 10:	Normalized AUC of Companies	22
Table 11:	Normalized AUC of Holding Companies	22
Table 12:	Best Results by segment.....	22
Table 13:	Presence of variables in Logistic Regression models.....	24

Index of Figures

Figure 1:	ROC curve of the all customers dataset (out-of-time sample).....	23
Figure 2:	Importance of variables.....	25
Figure 3:	Neural Network	31
