

Table of contents

1. Comprehensive introduction of the thesis	1
1.1. Approaches to explain farmers' behaviors.	2
1.2. References.....	6
2. First chapter	10
2.1. Introduction.....	11
2.2. The case of Chile and its forestry sector	12
2.3. Data and Methods	14
2.3.1. Data	14
2.3.2. Database treatment	15
2.3.3. Empirical model	16
2.4. Results.....	18
2.4.1. Descriptive statistics.....	18
2.4.2. Effect of the forestry subsidy on land use change.....	21
2.4.3. Effect of the forestry subsidy on off-farm income	24
2.5. Discussion	25
2.6. Conclusions.....	30
2.7. References.....	31
2.8. Appendices.....	37
3. Second chapter.....	40
3.1. Introduction.....	41
3.2. Incentives for sustainable agriculture: SIRSD-S program.....	43
3.3. Literature review	44
3.3.1. Motivational drivers of sustainable behaviour	45
3.3.2. Risk perception and perceived behavioral control of soil erosion, and attitudes towards remedial actions.....	46
3.4. Conceptual framework, data and methods.....	47
3.4.1. Conceptual framework	47
3.4.2. Study area, data collection, and survey	48
3.4.3. Model estimation.....	49
3.5. Results.....	52

3.5.1. Descriptive statistics.....	52
3.5.2. Model estimation results	55
3.6. Discussion	59
3.7. Conclusions.....	62
3.8. References.....	62
4. Third chapter.....	68
4.1. Introduction.....	69
4.1.1. The case of Chile.....	70
4.2. Data and methods.....	72
4.2.1. Study area.....	72
4.2.2. Data collection.....	73
4.2.3. Data processing using factor analysis	74
4.2.4. Cluster analysis	74
4.3. Results.....	75
4.3.1. Descriptive statistics.....	75
4.3.2. Cluster analysis results	81
4.4. Discussion	88
4.5. Conclusion	92
4.6. References.....	93
4.7. Appendices: Items and factor loadings to build constructs	98
4.8. Reception e-mail from the journal Water Resources Research	100
5. Comprehensive conclusions of the thesis.....	101
6. Appendices: Complementary activities carried out during the PhD	103
6.1. Publications developed and in development	103
6.2. Attendance at conferences	103
6.3. Internships and training.....	104
6.4. Teaching, consulting and scientific collaboration	105
